3: Neck* // Bridge*

4: Neck IC + Bridge IC

5: Bridge*

Color Codes : Wolfetone

Left to Right Switch Numbering

rev : B

date : 2000-05-26

Key :

OF Outer Finish

OS Outer Start

IF Inner Finish

IS Inner Start

* Pickup internally in Series

~ Pickup internally in Parallel

+ two components in Series

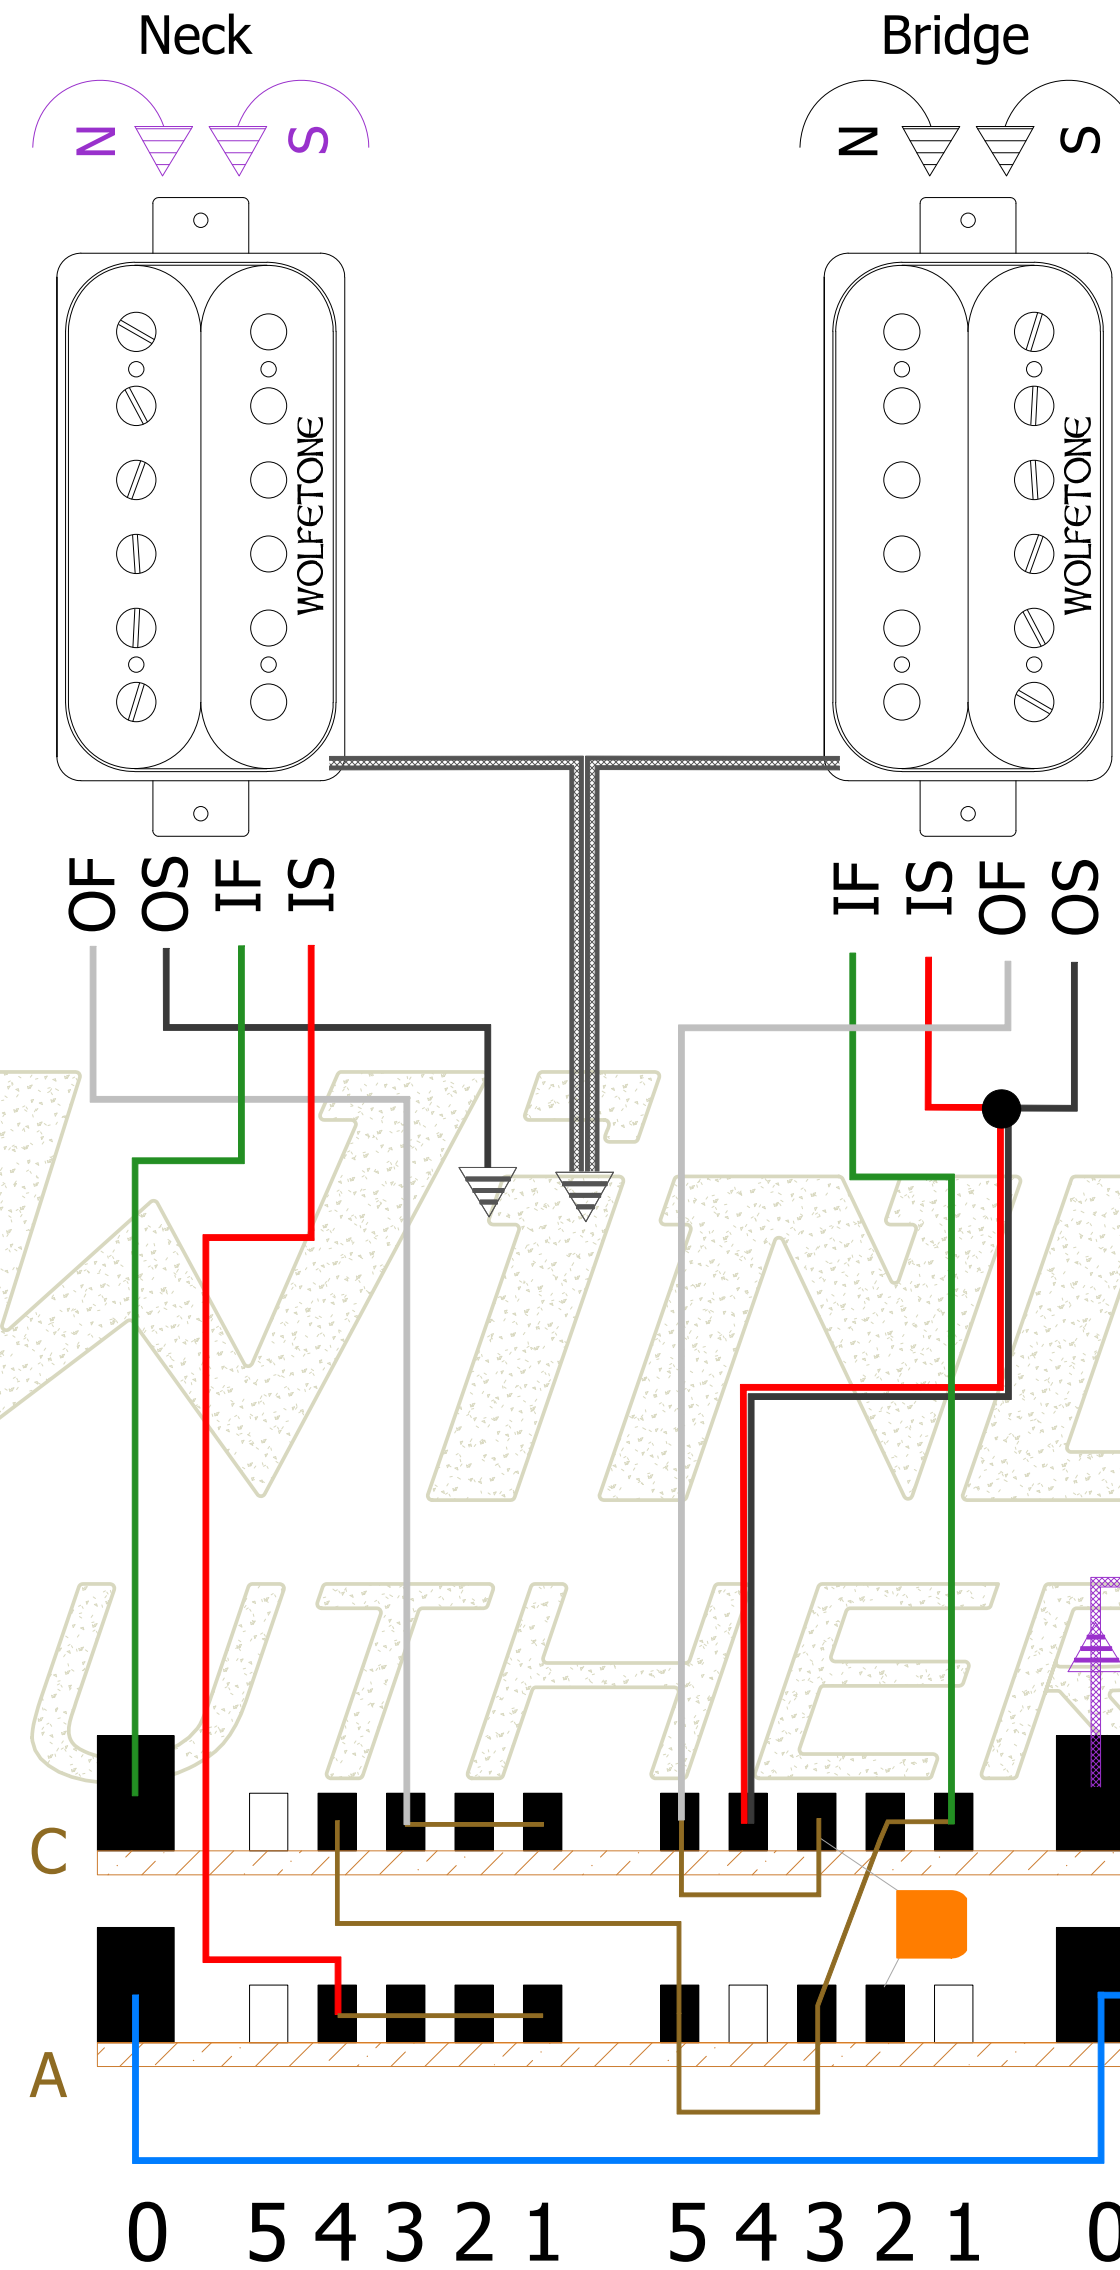

// two components in Parallel

IC Inner Coil

OC Outer Coil

OOP Out Of Phase

HOOP Half Out Of Phase

<--- Nut

Bridge --->

*Note 1: Neck pickup magnet flipped 180° to achieve inner slug coil South polarity

*Note 2: This circuit is designed for two low to medium output PAF type pickups with non-identical coils - one screw, one slug
If used with two pickups with matching coils, ie, Dual Screw or Dual Blade pickups, P4 may sound very similar to P3
