

2 Humbuckers Volume-Blade-Tone

Shown with:
CRL #1452 "Pure Vintage" 3 Way Switch
0038993049 and CTS 450g series pots
(500K recommended)

to make connecting braided shield
humbuckers easier :

- use a solid buss wire to make the ground connection between the back of tone and volume pots
- before connecting it, bend a loop in the buss wire near where the pickup wires will enter the cavity
- pushback the braided shields close to the loop, then tin and solder them to it
